Re: KAZV-LP Communication of February 27, 2012

Cc: Frank and Linda Azevedo

Linda Ludovici

Mr. Avery:

This communication is response to your recent letter as cited above.

First, I would note some statistical and factual errors in your analysis.

1. Although technically licensed to the City of Modesto, the transmitter and tower for KAZV-LP are located in Stanislaus County and utilize a Patterson, CA address, and have since the initial licensing of the station. The population of Patterson, CA was under 35,000 as of the specified date in 1990.
2. The address to which the station was licensed, while having a Modesto mailing address, is not located in the city limits of Modesto, but in an unincorporated area which is technically part of the country.
3. The population information which you ascribe to Modesto as of 1990 (240,580) is the current population of the city of Modesto, not the population on June 30, 1990.

Second, I believe that it is clear that the stations you cite as removing us from the "Qualified low power" status do not serve the same clientele as is served by KAZV-LP.

1. The station licensed to Ceres, CA. KBSV-DT is commonly known as ASSYRIANVISION and serves the Assyrian community with 95% of their programming not in the English language.
